

Benjamin Porchet

Full-stack and product developer

Lausanne, Switzerland · +41 79 103 70 43 · benjaminporchet.pro@gmail.com
benjampo.ch · github.com/Benjampo

Full-stack application developer with more than five years of software-development experience. I take products from needs discovery through architecture and production delivery while staying close to users and business-relevant data.

Experience

February 2026 - Present

Application Developer | Jobtrek

Full-time · Lausanne

- Design and evolve the organisation's central CRM for beneficiary follow-up, company prospecting, and turning operational data into decisions.
- Own both software development and product steering, from user workshops and prioritisation through end-to-end delivery.
- Use AI agents extensively to shorten the path from idea to production.

March 2023 - January 2026

Full-stack Developer | Quanthome

TypeScript · React · Node.js · Next.js · Python · FastAPI · PostgreSQL · AWS

- Co-designed and built the main product from architecture and technology choices through production deployment.
- Delivered a strategic custom internal tool end to end, from ideation to production.

December 2021 - December 2022

Frontend Developer | Maven

JavaScript · Vue.js · React · PHP · Laravel · MySQL

- Built a university form-management tool with Vue.js and Laravel.
- Built a React frontend for a cybersecurity company and delivered websites and audits for multiple clients.

July 2020 - January 2021

Mediamatics Intern | Yantra Connection

WordPress · PHP · JavaScript · UX

- Created and maintained the company's e-commerce website and contributed to its visual and UX design.

Selected projects

Itongo: lead developer for a farm-management mobile application in Benin using Java, Spring, and React Native.

UNIL: Python file-format conversion scripts for digital archives.

Runeo: React Native and Laravel transport-management platform used by Eurockéennes and Paléo Festival.

Skills

Frontend: TypeScript, JavaScript, React, Next.js, Vue.js, React Native, Tailwind CSS

Backend and data: Node.js, Express, Python, FastAPI, PHP, Laravel, Java, Spring, PostgreSQL, MySQL

Cloud and delivery: AWS, Docker, CI/CD, GitHub Actions, Terraform, Linux, Bash

Product: user workshops, prioritisation, product steering, end-to-end delivery, AI agents
